

## DURAGAL<sup>®</sup> ANGLES

All DuraGal<sup>®</sup> products provide a superior level of corrosion resistance through the unique chemical composition of the zinc coating, which also contains 3% Magnesium and 2.5% Aluminium. This advanced galvanised coating allows consistent and uniform quality during manufacture, can be produced in high volume at any length and provides an attractive, spangle-free surface finish that removes the need for secondary galvanising operations.

DuraGal<sup>®</sup> Angles are readily available in an extensive range of sizes and thicknesses, as shown below:

Designation			Pack Size	Mass (kg/m)
D (mm)	B (mm)	T (mm)		
6.0 metres				
25	25	2.5	80	0.894
30	30	2.5	80	1.093
40	40	2.5	60	1.490
		4.0	39	2.310
45	45	2.5	54	1.689
50	50	2.5	33	1.888
		4.0	27	2.943
		5.0	24	3.594
9.0 metres				
50	50	2.5	33	1.888
		4.0	27	2.943
		5.0	24	3.594
		6.0	21	4.249
65	65	4.0	22	3.892
		5.0	22	4.779
75	75	4.0	22	4.525
		5.0	22	5.569
		6.0	18	6.664
90	90	5.0	22	6.754
12.0 metres				
100	100	6.0	16	9.078

## DuraGal<sup>®</sup> Profiles

THE DIFFERENCE IS DURAGAL

**Note:** Radius R is a minimum 3.5mm

### NEED SOMETHING DIFFERENT?

Australian Rollforming is a custom metal rollforming specialist with the capability to rollform an almost infinite variety of profiles using a wide range of metals.

DuraGal<sup>®</sup> Angles can be manufactured to your desired dimensions and lengths with in-line hole punching or edge bevelling also available (non-standard items may be subject to minimum order quantities). Additional technical specifications, including section properties, are available on request.

**Contact us to discuss your requirements.**
